

## Technical requirements for the show truck presentation of Endress+Hauser

### Access/floor area:

Please make sure that the show truck has enough space to shunt. It should not block through traffic or escape routes and requires a paved surface.

Data of the vehicle:

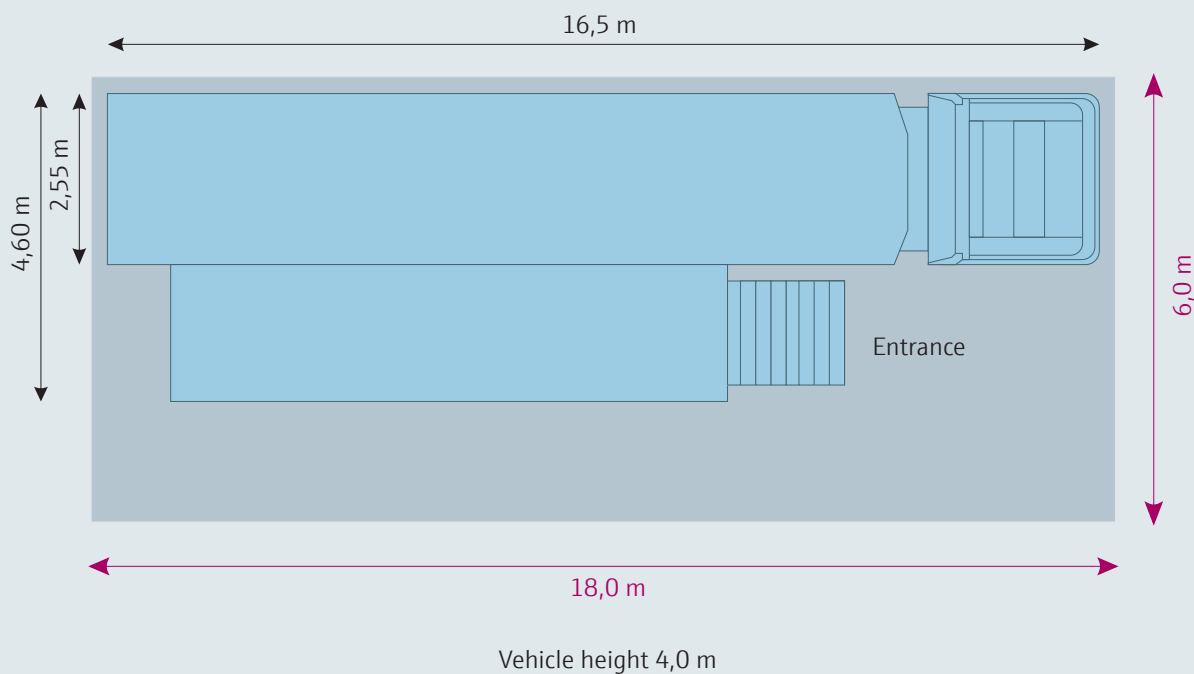

- Total weight 34 t.
- Optimal parking space: 18,0 x 6,0 m (for actual size see the drawing below)
- Total length: 16,5 m
- Total width (with side panel extended): 4,60 m
- Vehicle height: 4,00 m

### Power supply:

- The show truck requires an external current of 32 A, connection 32 A CEE plug, 5-pin. The power supply should not be farther away than 40 m (40 m extension cable on board)
- If this is not possible, we can also provide our on-board generator

### License number:

Truck LÖ-DC-860  
Trailer LÖ-EH-8600

### Planning:

- Is sufficient parking space available?
- The driver needs about one hour for each assembly and disassembly.  
For early morning appointments, we recommend setting up the previous evening.
- Wi-Fi is available in the vehicle
- Water connection is not necessary
- We offer drinks and snacks on request
- If there are special regulations, please inform us!
- Does our driver need a safety instruction?
- Please inform the security staff about the visit of the show truck
